Commercial airliners today whisk passengers through the air at high speeds, but they can't come close to breaking the speed of sound. Even back in the era of the Concorde, supersonic travel was the exception for commercial aviation, not the rule. The iconic craft suffered a catastrophic crash in 2000 and stopped flying in 2003. Meanwhile, supersonic military aircraft are common. Fighter jets like F-16s or F-35s can routinely smash through the sound barrier. It's rare, though, to see a new design aimed at the civilian market. However, there's a glimmer of hope that someday, perhaps before the end of the decade, regular folks could fly between cities at astonishing speeds that exceed the rate at which sound travels. One company trying to make that happen is called Boom, and it has rolled out a plane they call the XB-1. The XB-1 is not a passenger plane, but instead, the Colorado-based company sees it as a stepping stone towards its ultimate goal: a craft called Overture that will indeed carry people.

35. According to the passage, which statement is true?

- A) It's typical for military aircraft to break the speed of sound.
- B) There are commercial planes that enable passengers to fly at the speed of sound.
- C) Supersonic travel is still possible for people in today's world.
- D) In this decade, it is a routine for regular people to travel at the speed of sound.
- E) There are several newly designed aircraft to carry people on supersonic travels.

36. The main purpose of the passage is to ----.

- A) explain how the aircraft can break the speed of sound
- B) discuss the difference between regular flights and supersonic ones
- C) point out the possibility of traveling at high speed for regular people
- D) give information about the supersonic military aircraft
- E) announce that supersonic travel for commercial aviation is available

37. What can be inferred from the passage about supersonic aircraft?

- A) Overture is the latest designed aircraft for military service.
- B) Military aircraft are the best examples of supersonic flights.
- C) There haven't been any supersonic flights since the catastrophic crash in 2000.
- D) Concorde is still the best supersonic aircraft for commercial flights.
- E) There is no company that tries to design supersonic aircraft.

Despite the billions of dollars that have been spent on Alzheimer's research, we still don't have a complete understanding of how this devastating disease develops. So, it may take decades before we have a cure if one is in the future at all. According to a UC Berkley study, engaging in mentally stimulating activities such as crossword puzzles is associated with a lower accumulation of beta-amyloid plaque. In other words, the brains of mentally active participants looked younger. Moreover, Dr. Theresa Sumberac states that leisure activities such as solving crossword puzzles, playing card games, and reading provide an avenue to stimulate the mind, thus delaying the onset of dementia with relatively few negative consequences. Therefore, these activities should be recommended to the healthy elderlies, too.

38. One can conclude from the passage that the author mainly explains ----.

- A) scientific approach in mentally stimulating activities
- B) pros and cons of doing crossword puzzles
- C) how to cure Alzheimer's disease in the future
- D) the importance of scientific research for Alzheimer's
- E) stimulating activities for elderly patients

39. It is pointed out in the passage that ----.

- A) dementia is mainly caused by Alzheimer's disease
- B) cure for Alzheimer's disease can be puzzles
- C) beta-amyloid plaque makes us look younger
- D) stimulating mind has a delaying effect for the disease
- E) there hasn't been enough fund for scientific research

40. Which of the following cannot be inferred from the passage?

- A) There is no sight of a cure for the disease in the foreseeable future.
- B) Stimulating the brain is important for putting off dementia and Alzheimer's.
- C) Some leisure activities may have a few positive effects on the brain.
- D) There is an abundance of funding put into Alzheimer's research.
- E) Healthy people have no benefit to gain from mentally stimulating activities.

Flamenco is originally from Andalucía, a region in Southern Spain. It was originally the dance of Spanish gypsies, who came to southern Spain through Iran, Iraq, Greece, and Turkey. The gypsies used all of these different cultures to create the flamenco dance and music. The gypsies were very different from the Spaniards. They spoke not Castilian but their own language. Their clothes were also different, and for these reasons, Spanish society tried to reject them. The gypsies used Moorish, Jewish, and African influences to form flamenco. Flamenco music often sounds sorrowful, reflecting the hard lives of the gypsies who had to do manual work to get by. The roots of flamenco, therefore, lead us back to lives of hardship and sadness. However, it was in Jerez de la Frontera that the gypsies managed to find their place. They managed to integrate into society and were more accepted by the Spaniards. People also say that their flamenco is influenced by the sea which is an integral part of life. The flamenco movements convey lots of passion and energy, and the dancers' shoes make a 'clacking' sound on the floor as they dance. Their movements are sudden and create lots of suspense and emotion.

41. It can be understood from the passage that Flamenco was created ----.

- A) by people from different cultures who came from Eastern Spain
- B) by Spanish gypsies who travelled Spain from different countries
- C) in Jerez de la Frontera where gypsies managed to find their place
- D) because the gypsies were rejected by Spanish society
- E) to display their passion and energy

42. What is the main purpose of the passage?

- A) To give examples of the flamenco dance and music.
- B) To inspire and encourage people to start learning flamenco dance.
- C) To explain basic rules of flamenco music and dance.
- D) To find out more about flamenco and where it comes from.
- E) To show how you can sing flamenco songs and do the flamenco dance.

43. Which of the following could be the best title for the passage?

- A) The Spanish Gypsies
- B) The Origins of Flamenco
- C) Andalucía and Flamenco
- D) The Life of Spanish Gypsies
- E) Sorrow, Sadness, and Flamenco

76. (I) Archimedes, the most famous mathematician and inventor in ancient Greece, was born in Syracuse, in 287 B.C. and died in 212 B.C. (II) Archimedes probably spent some time in Egypt early in his career, but he resided for most of his life in Syracuse, the principal Greek city-state in Sicily, where he was on intimate terms with its king, Hieron II. (III) He was a brilliant mathematician and developed the science of geometry to a high level. (IV) Archimedes is especially important for his discovery of the relation between the surface and volume of a sphere and its circumscribing cylinder. He is known for his formulation of a hydrostatic principle, known as Archimedes' principle and a device for raising water, known as the Archimedes screw. (V) One form of it consists of a circular pipe enclosing a helix and inclined at an angle of about 45 degrees to the horizontal with its lower end dipped in the water; rotation of the device causes the water to rise in the pipe. Other forms consist of a helix revolving in a fixed cylinder or a helical tube wound around a shaft.
